BUNGE

overview

Bunge is committed to being a good corporate citizen. That means acting ethically, maximizing the value we create, minimizing the impact of our business on the environment, ensuring high levels of safety in our operations and products, and furthering the well-being of our stakeholders and the communities where we operate.

This booklet provides highlights from the *Bunge Citizenship* web site. To learn more about our policies, activities and performance related to corporate citizenship, environmental stewardship and sustainability, please visit www.bunge.com/citizenship.

BUNGE SUSTAINABILITY POLICY

Bunge is committed to sustainable development and adheres to the following principles:

- We strive to be good citizens by contributing to the economic and social development of the communities where we work;
- We work to achieve a high level of environmental performance by adopting science-based, culturally sensitive and pragmatic best practices and by promoting these practices within our supply chain;
- We partner with companies and organizations to promote and apply sustainable practices; and
- We communicate openly about our activities and maintain a constructive dialogue with stakeholders.

We apply these principles across our operations, pursuing both global and regional goals.

ethics, governance & values

Bunge is a company whose operations and activities are rooted in strong principles and high standards of conduct. These principles form the basis of Bunge's five core values – *Integrity, Teamwork, Openness & Trust, Entrepreneurship* and *Citizenship*. They also are expressed in the *Bunge Blue Book*, which explains the company's purpose, approach, values and role in the world. The *Bunge Blue Book* is available in 15 languages.

Bunge has policies and procedures that promote the company's principles and govern the management of its business. They consist of:

- Bunge's Code of Ethics
- Bunge's Corporate Governance Guidelines
- Bunge's Ethics and Compliance Hotline

Bunge offers its employees equal opportunity, competitive compensation and benefits, and programs designed to promote individual health, wellness and quality of life. We are committed to providing a safe working environment.

We believe all employees have the right to be treated with dignity and respect, to receive a fair wage and to work in safe conditions. We have policies in place to uphold these standards and to ensure good practices both in our own operations and in our supply chain.

On the job, ensuring the safety of our employees is our first priority. Bunge's goal is to be a company with zero lost-time incidents, and our cardinal rule is that no work is so important or urgent that it cannot be performed safely.

BUNGE SAFETY POLICY

- No work is so important or urgent that it cannot be performed safely.
- All work-related injuries, illnesses and unsafe practices are preventable.
- All personnel are responsible and accountable for their own safety and the safety of others.
- Safety performance is a key indicator of operational excellence.

Bunge is a large agribusiness and food company with industrial and logistics operations that can generate environmental impacts in the form of emissions, wastes and resource use. We work continuously to minimize the environmental footprint of our operations by reducing the waste we generate, promoting recycling and the efficient use of energy and natural resources, and mitigating environmental risks in our supply chain.

BUNGE ENVIRONMENTAL POLICY

Bunge's business will be conducted in a manner that promotes environmental quality. To achieve this Bunge will:

- Comply with environmental laws and requirements applicable to our processes, products and services.
- Promote continual environmental improvement and sustainable development by applying environmental management principles, environmental performance indicators and environmental risk assessments.
- Provide and support employee environmental management training, respect for the environment and environmental performance responsibility.
- Measure and assess environmental performance associated with our facilities' processes, products and services.
- Demonstrate social responsibility by seeking to meet the environmental needs of our communities and by promoting the responsible use of natural resources.
- Seek pollution prevention, waste minimization, reuse and recycling in our processes, products and services, when technically feasible and economically justified.

sustainable agriculture

Bunge works with farmers worldwide to improve the food production chain at its first and most vital link, while also contributing to larger efforts addressing agricultural sustainability.

Bunge is working to meet the growing global demand for food with a focus on improving the sustainability of the entire food production chain, from farm to table.

As the global population grows in both size and prosperity, so does the demand for food. According to the United Nations, food production will need to increase 70 percent by 2050 to keep up.

Growing more food is only part of the answer. Land available for farming is in limited supply. Both people and

food need land on which to grow, and natural areas deemed important to the health of the planet also must be preserved. In addition, food production requires soil, water and other natural resources and generates pollution and other environmental impacts.

Bunge is working to meet the challenge of growing more food with less land and less overall impact on the environment by improving the sustainability of our own operations and by collaborating with farmers and other partners in the food production chain to preserve and renew natural resources and promote best practices in agricultural production and environmental management.

sugar & bioenergy

Bunge is a global producer and marketer of sugar. In the first quarter of 2010, with the addition of five sugarcane mills to its other existing mills in Brazil, Bunge established a large-scale sugar and bioenergy business capable of producing various sugar and ethanol products. Brazil is the world's leading exporter of sugar and sugarcane ethanol and a fast-growing domestic market.

Ethanol produced from sugarcane is one of the most attractive transport fuels. It is made from renewable sources and burns cleaner than fossil fuels. Because Bunge's sugarcane mills generate electricity by burning bagasse, the fibrous byproduct of sugarcane processing, they have a low emissions profile. In addition, the surplus electricity they create helps meet local power needs.

In 2010, Bunge established a large-scale sugar and bioenergy business capable of producing various sugar and ethanol products and supplying electricity to local communities. From production to consumption, sugarcane ethanol emits up to 90 percent less greenhouse gases than gasoline, according to data from the International Energy Agency.

Bunge brings oilseeds, grains and other agricultural products from where they are grown to where they are needed, ensuring a safe and reliable source of affordable high-quality food for people all around the world.

We add value to our products through refining and processing. We crush oilseeds to make vegetable oils, margarines, mayonnaises and shortenings, and we mill grains to make ingredients used in cereals, breads and baked goods. These dietary staples help power people's lives.

Bunge's food products help deliver vital nutrients that may be lacking in certain regional diets. In Ukraine, Bunge developed *Oleina IntellectUm* to address an endemic deficiency in omega-3 fatty acids. In Romania, Bunge launched *Floriol Iod Protect*, the country's first iodine-enriched vegetable oil.

community involvement

Bunge is an active and engaged member of the communities where we work and live around the world. Our involvement takes many forms. We assist in disaster and hunger relief efforts, work on community projects, contribute to environmental preservation, improve farm safety, promote education and literacy, and support arts and culture.

Bunge is committed to improving the well-being of our stakeholders and the people who live in the many diverse communities that we call home. All around the world, Bunge employees contribute their time, expertise and energy to make life better in the places where we work and live.
